

## **Engr 688: Current Issues in Telecommunications**

### **SCHOOL OF ENGINEERING**

Survey of modern communication systems, practices, technology, business applications, and regulatory issues. Wireless systems, protocols, problems in propagation, spectral allocation, and modulation techniques. Asynchronous Transfer Mode and B-ISDN. Use of satellites for personal communications.

3 Credits

### **Prerequisites**

- [TC 501: Foundations of Communications](#) (Minimum grade: C)
- [TC 534: Wireless Mobile Communications](#) (Minimum grade: C)

### **Instruction Type(s)**

- Lecture: Lecture for Engr 688

### **Subject Areas**

- [Engineering, General](#)
- [Electrical and Electronics Engineering](#)
