

## Csci 521: Computer Systems Engineering

### COMPUTER & INFORMATION SCIENCE

Analysis of computer system components and manufacturing economics, and how they influence design goals, direct architectural development, create hardware/software issues and modify implementation concepts, as well as system and circuit packaging.

3 Credits

#### **Prerequisites**

- Pre-requisite: CSCI 423 or CSCI 501 or Graduate Standing

#### **Instruction Type(s)**

- Lecture: Lecture for Csci 521

#### **Subject Areas**

- [Computer Science](#)
