

Hon 315: Explorations in Population Health

SALLY MCDONNELL BARKSDALE HONORS COLLEGE

This course will explore human population health from a multidisciplinary perspective, with particular attention to understanding complex health problems and informing solutions. Studies will include insights from sociology, demography, epidemiology, public health, nutrition, nursing, medicine, physiology, and biochemistry, among others. Students will learn from diverse scholars and practitioners through readings, facilitated discussions, guest lectures, panel presentations, and field experiences.
