

## **Csci 356: Data Structures in Python**

### **COMPUTER & INFORMATION SCIENCE**

This course will introduce data structures and their application using the Python programming language. Abstract data types for stack, queue, various lists, trees and graphs will be studied. Built-in data structures such as lists, dictionaries, and tuples will be used extensively.

3 Credits

#### **Prerequisites**

- Pre-Requisite: 24 Earned Hours

#### **Instruction Type(s)**

- Lecture: Lecture for Csci 356

#### **Subject Areas**

- [Computer Science](#)
