

Csci 431: Robotics Programming

Computer & Information Science

The goal of this course is to provide students hands-on experience in the design, construction, and programming of robots that are driven by micro-controllers (e.g., LEGO EV3 mobile robots). Upon completion of this course, students should be able to develop a robotic system from available modular units; to understand the role of knowledge representation, problem solving, and learning in intelligent-system engineering; and to explain the basic concepts of robotics systems.

3 Credits

Prerequisites

- [Csci 211: Computer Science III](#) \$target.descriptions.MinimumGrade\$
- [Csci 223: Computer Org. & Assembly Language](#) \$target.descriptions.MinimumGrade\$
- Pre-Requisite: 24 Earned Hours

Instruction Type(s)

- Lecture: Lecture for Csci 431

Subject Areas

- [Computer Science](#)
