

M E 533: Electronic Properties of Materials Mechanical Engineering

Theories of electron/atom interactions and electron transport are examined to explain the electronic properties of solids. Junctions, magnetic and optical properties are also discussed with special emphasis on semiconducting materials.

3. Credits

Prerequisites

• Prerequiste: Junior standing (60 hr).

Cross-listed Courses

• El E 533: Electronic Properties of Materials

Subject Areas

- Mechanical Engineering
- Electrical and Electronics Engineering
- Materials Science
