

## Math 262: Unified Calculus & Analytic Geometry II

### [Mathematics](#)

This is the second course in a four-term calculus sequence for engineering and science majors. Topics include definite and indefinite integrals, areas under and between curves, the fundamental theorem of calculus, integration techniques, computation of volumes, surface areas, and length of curves, improper integrals.

After completing Math 262 with a C or higher, students may not receive credit for Math 121, 125, or 268.

3 Credits
