

BME 510: Drug and Gene Delivery

Biomedical Engineering

Fundamentals of drug delivery, including routes of delivery, physiologic drug delivery barriers, and pharmacokinetics/pharmacodynamics. Focus on new biomaterials underdevelopment for enabling controlled release, tissue targeting, improved bioactivity of different classes of compounds, and delivery of different classes of nucleic acid based therapeutics.

3 Credits

Prerequisites

- [Bisc 162: Biological Sciences II](#) \$target.descriptions.MinimumGrade\$
- [Chem 106: General Chemistry II](#) \$target.descriptions.MinimumGrade\$

Instruction Type(s)

- Lecture: Lecture for BME 510

Subject Areas

- [Bioengineering and Biomedical Engineering](#)
