

Ch E 550: Membrane Science and Engineering

This course covers the science of membrane processes and the engineering of membrane system module and process design. Topics discussed include: membrane transport theory, porous and nonporous membranes, membrane characterization, and unit operations with a focus on the application of membrane theory to unit operations and the optimization of both industrial and academic applications.

3 Credits Prerequisites

• Engr 322: Transport Phenomena \$target.descriptions.MinimumGrade\$

Instruction Type(s)

• Lecture: Lecture for Ch E 550

Subject Areas

<u>Chemical Engineering</u>

Related Areas

• Chemical and Biomolecular Engineering

The University of Mississippi is accredited by the Southern Association of Colleges and Schools Commission on Colleges to award certificates and baccalaureate, master's, specialist and doctoral degrees. Contact the Commission on Colleges at 1866 Southern Lane, Decatur, Georgia 30033-4097, call 404-679-4500, or visit online at www.sacscoc.org for guestions about the accreditation.
