

# Phcy 606: Population and Rural Health

## School of Pharmacy

The purpose of this course is to introduce student pharmacists to population health – that is, the health outcomes of a group of individuals, including the distribution of such outcomes within the group at local, national, and international levels. This course will also examine the rural burden of disease including health profile, determinants of rural health, and strategies to improve rural population health. The focus of this course is on pharmacists' roles in population and rural health outcomes, identifying and addressing patterns of health determinants, and policies and interventions that link these topics. Students will learn from diverse scholars and practitioners through readings, facilitated discussions, guest lectures, and panel presentations. One of the major goals of the course will be to enable students to apply the concepts underlying the trends in health care to the health status of populations in their clinical settings as well as in integrated delivery systems of the future.

3 Credits

### Prerequisites

- Pre-requisite: Pharmacy PY3

### Instruction Type(s)

- Lecture: Lecture for Phcy 606

### Course Fee(s)

#### Pharmacy Practice 3

- \$85.00

### Subject Areas

- [Pharmacy \(PharmD - USA - PharmD, BS/BPharm - Canada\)](#)

### Related Areas

- [Clinical and Industrial Drug Development \(MS, PhD\)](#)
- [Industrial and Physical Pharmacy and Cosmetic Sciences \(MS, PhD\)](#)
- [Medicinal and Pharmaceutical Chemistry](#)
- [Natural Products Chemistry and Pharmacognosy \(MS, PhD\)](#)
- [Pharmaceutical Marketing and Management](#)
- [Pharmaceutical Sciences](#)
- [Pharmaceutics and Drug Design \(MS, PhD\)](#)
- [Pharmacoeconomics/Pharmaceutical Economics \(MS, PhD\)](#)
- [Pharmacy Administration and Pharmacy Policy and Regulatory Affairs \(MS, PhD\)](#)
- [Pharmacy, Pharmaceutical Sciences, and Administration, Other](#)
