

Engr 616: Isotope Hydrogeology

School of Engineering

Applications of stable and radioactive isotopes for solving environmental and low-temperature geologic problems. Problems that will be addressed include measurement techniques and limitations, tracing the origin of water and contaminants in natural systems, applications for global climate change and paleoclimates, quantifying infiltration and groundwater travel rates, and age dating of water.

3 Credits

Instruction Type(s)

- Lecture: Lecture for Engr 616

Subject Areas

- [Engineering, General](#)
- [Geological Engineering](#)
- [Geology/Earth Science, General](#)
