

Phys 310: Mechanics Physics & Astronomy

This course is a study of the motion of systems of particles and rigid bodies in inertial and non-inertial reference frames, using the Newtonian, Lagrangian and Hamiltonian formulations of classical mechanics. Topics include harmonic motion, drag forces, conservative forces and energy, and the Coriolis and centrifugal forces.

3 Credits

Prerequisites

- Math 353: Elementary Differential Equations \$target.descriptions.MinimumGrade\$
- Phys 212 or Phys 303

Instruction Type(s)

• Lecture: Lecture for Phys 310

Subject Areas

Physics, General

Related Areas

- <u>Acoustics</u>
- <u>Atomic/Molecular Physics</u>
- <u>Condensed Matter and Materials Physics</u>
- Elementary Particle Physics
- <u>Nuclear Physics</u>
- Optics/Optical Sciences
- Physics, Other
- <u>Theoretical and Mathematical Physics</u>

The University of Mississippi is accredited by the Southern Association of Colleges and Schools Commission on Colleges to award certificates and baccalaureate, master's, specialist, and doctoral degrees. Contact the Commission on Colleges at 1866 Southern Lane, Decatur, Georgia 30033-4097, call 404-679-4500, or visit online at www.sacscoc.org for questions about the accreditation.
