

C E 521: Advanced Mechanics of Materials Civil Engineering

Classical methods for second-order analysis of deformable bodies; failure criteria; torsion of thin walled sections; unsymmetrical bending of straight beams; curved beams; beam on elastic foundation; plates and shells; buckling.

Prerequisites

- Math 353: Elementary Differential Equations \$target.descriptions.MinimumGrade\$
- Engr 312: Mechanics of Materials \$target.descriptions.MinimumGrade\$
- Prerequiste: Junior standing (60 hr).

Instruction Type(s)

• Lecture: Lecture for C E 521

Subject Areas

questions about the accreditation.

- Civil Engineering, General
- Engineering Mechanics

The University of Mississippi is accredited by the Southern Association of Colleges and Schools Commission on Colleges to award certificates and baccalaureate, master's, specialist,
