

# Phys 530: Independent Study in Physics I

## Physics & Astronomy

This is an independent study course. Students can take it to learn the basic concepts of an area in which they may then carry out a research project. The course content is driven by student interest, with specific topics chosen by the instructor in consultation with the student. The format is based on readings and homework assigned by the instructor and weekly meetings during which the assigned topics are discussed.

1 - 3 Credits

### Prerequisites

- Instructor Approval Required

### Instruction Type(s)

- Indiv Based: Individual Based fro Phys 530

### Subject Areas

- [Physics, General](#)

### Related Areas

- [Acoustics](#)
- [Atomic/Molecular Physics](#)
- [Condensed Matter and Materials Physics](#)
- [Elementary Particle Physics](#)
- [Nuclear Physics](#)
- [Optics/Optical Sciences](#)
- [Physics, Other](#)
- [Theoretical and Mathematical Physics](#)
